BACKTECH SAM

Systeme, Anlagen und Maschinen der Bäckereitechnik

A new milestone in a 22-year success story.

What began in 1993 as a mere service company has in the meantime developed into today's innovative manufacturer of modern bakery equipment. SAM is made up of its three founders, Mr Norbert Graf, Mr Josef Weinberger and Mr Siniša Solić, as well as their eight employees.

Thanks to the acquisition of BACKTECH and its technologies, we are complementing our product portfolio for industry and trade. Therefore, BackTech SAM GmbH engineering will represent an expansion to our range.

This includes mechanical and electro-technical processes as well as service for all BACKTECH products.

Our service.

We guarantee provision of service and replacement parts for our customers.

Dough dividing and moulding machines / roll plants

We now cover weights of 15 to 350 grams with an hourly output of between 8 and 60 cuts per minute.

Compact lines

We offer proofers with an integrated stamping and cutting unit with enclosed setter.

Element systems.

These include long moulding, curling, stamping and cutting the dough on the conveyor belt.

We have acquired all the data sets, construction documents and expertise for the entire assortment of products.

This represents a further milestone in the ongoing improvement of BackTech SAM GmbH products.

The new company BackTech SAM GmbH serves the global market with its solutions.
